Freedom of Information - Access to Deceased Patient Record

Section 37 of the Freedom of Information Act 2014

Section 37 of the FOI Act exempts records containing personal information, including personal information of a deceased person, from disclosure, subject to certain specific exceptions. In the case of records of deceased persons, section 37(8) provides that the Minister may make regulations for access by specific categories of requester.

Three categories of requester are identified in these regulations:

Category 1 - Personal representative - The personal representative of the deceased acting in due course of administration of the estate of the deceased or any person acting with the consent of the personal representative so acting.

Category 2 - A person appointed by the courts or by statute - This category covers a person on whom a function is conferred by law in relation to the individual or his or her estate acting in the course of the performance of the function. This would cover cases where the estate and subsequent affairs of the deceased are taken over by a court or State agency.

Category 3 - Spouse/former spouse, partner/former partner, next of kin - This category covers Spouses/former spouses, partners/former partners or next of kin of the deceased: This category permits, in appropriate circumstances, access to certain records to be given to the different individuals who enjoyed a particular relationship with the deceased.

Once the hospital is satisfied that the requester comes within the scope of category 3, it may make such enquiries and engage in such consultation as is necessary to come to a decision – **if the public interest would be better served by granting than by refusing the request.** Taking this into account it is reasonable for the hospital to seek as much information as to the circumstances of the request. Each case is judged on its own merits.
